			469.67

Display Set Up.

This table shows the firework site layout and firing times. The rows should be approximately 1 - 2 meters apart to allow you to move between the fireworks. The left and right columns should be approx 15 - 25 meters either side of the centre row. (Space permitting). If you don't have enough depth in your display site for each row lay down half then start from the front again.

ROW	Light Time	Firework Layout		
21	09:50		21	
20	09:45	20		20
19	09:05		19
